

TAKE AWAY PAIN ...

... is drive, philosophy and task all in one for the therapist Simone Märten. For 20 years now, Simone Märten, masseuse, medical swim advisor, physiotherapist for sport, treats versatile illnesses. She has now developed a device which amazes the experts, patients and everybody using it. „PERL“ gets to the basis of our feet What is „PERL“ capable of - we asked the inventor Simone Märten.

How does the idea of a physio-therapist grow to develop such a technical device?

I have always been fascinated with my high interest in technics on any new development. Of course do I love to work with my hands as a therapist. But that can't be all. Technic has by today grown so much that it has many ways of placing them into therapy. So I combined my affinity for technics with my practical knowledge and experience and feeling what patients need to develop this BMS foot treatment device.

How does this health and wellness instrument work?

Perl is stimulating the muscles in feet and legs bio-mechanically, it is based on a smooth vibration of 20 Hz. The apparatus moves the feet, encourages the blood circulation, trains the connective tissue and vane flaps, it encourages the drainage of the veins in the legs. For this whole positive result one only needs 5 min. per day. „PERL“ stimulates the activity of nerves and therefor achieves a positive result in the mental situation of the user. The device is easy to handle, the weight of 45kg not too heavy and it can be connected to any plug.

„PERL“ has many options to be used, on diabetics, oncological patients etc. - which ones are the most important to you?

I can't just answer it as there are so many individual needs and complaints. If someone needs a treatment before a long-distance flight against thrombosis, another one not being able to walk by himself anymore. For me „PERL“ has proven excellent in results and gone through my tests with full marks. So I know that it helps chemo-patients to ease their side effects, pain and numbness in their feet, it makes it more bearable or takes the pain totally.

by Clara Lichtenberg

BMS - foot-treatment device Perl

Relaxation, mobilization, blood circulation and foot reflex zone stimulation

- bio mechanical muscle stimulation (without pressure points)
- spends relaxation and comfort
- suitable for hotels, wellness centers, sporting clubs, airport Vip lounges senior homes, fairs, conference centers

BMS - „PERL“ the best option for wellness and training possibilities

BIO MECHANIC STIMULATION OF MUSCELS

BMS „PERL“

The apparatus working
wellness through your feet
in 5 min. per treatment

relaxation
mobilization
circulation
stimulation of foot reflex zones
and beautiful legs

Sensational market introduction

„PERL“ the apparatus to treat your body medically through your feet

This newly developed BMS device for treatment and mobilization of your feet is the only one existing in the market which is based on biochemical muscle stimulation.

It is positioned ergonomically to your feet. With the optimal position of the whole body when using the bio-mechanic muscle stimulation (based on 20 Hz) results in a proofed complete mobilization and relaxation.

The vibrating area, covered in anti bacterial leather passes on the vibration highly effectively through your feet into the whole body.

Used on a regular basis a muscle stimulation will achieve a positive influence of remodeling the contours of your legs.

The simple 5 min. treatment with PERL shows with it's totally mechanic effect on connective tissue an improvement of the veins drainage, training of the valve flaps which herewith result in relief of the cardiac muscle.

PERL also offers a pain therapy in the case of neuropathy in your feet which can occur in cases of oncological sickness.

Therefor it is possible to use this treatment for pain relief after chemotherapy on cancer patients.

PERL works effectively with the recommended position of legs and feet on diabetics, rheumatics, fibromyalgia patients and other patients that suffer from blood circulation disorder and all people that want to do something good in their life for their feet.

Chances and optimal results, if regularly used because of this effective method also offers help in the treatment of balance problems and osteoporosis.

Based on the facts and the simple usage we are sure that it will very quickly succeed on the market as a necessary offer in various sectors.

With you as the presenter of this apparatus with the climbing demand of expectations in the field of wellness and therapy it will surely result in an investment amortizable.

With this device you attract the attention on to your own business.

Offers for purchase and financing will be available at our branch.

Further BMS devices for wellness and training

Profit calculation medical foot treatment device „PERL“

With this instrument we meet the raising expectations in therapy and wellness sectors. We guarantee satisfied customers and their loyalty towards the equipment offered. To visualize the amortization and lucrativeness in the sector of autonomous self employment as well as an addition to an already existing business or rooms we have calculated a possible income. The calculated price by us amounts to 5,00 € per 5 min. treatment which does not mean that you can vary that on your own account.

Technical data

| Parameter | Valance |
|-------------------|-------------------|
| swing frequencies | 20 Hz |
| measurements | 670 x 670 x 56 mm |
| weight | 45 kg |

This results in the following calculation:

2 people using the device 5 min. per hour at an access for 10 hours within 5 days per working week you can earn 100,00 € per day, 500,00 € per week, 2.00,00 € per month without further personnel.

Financing and purchase on a rental basis are available through our bank.

BMS-Sigma II

The BMS-Sigma II with exchangeable heads / applicators was developed specially for the use on face, eyes, neck, back, extremities and for stimulation of metabolism, nutritive substance of body cells by reaching the extra cellular matrix.

Technical data

| Parameter | Valance |
|-----------------|---|
| swing frequency | 10-50 Hz |
| measurements | 5-50 Hz optional 200 x 150 x 43 mm (control gear BMS-Sigma II) 308 x 62 x 50 mm (application part BMS-R II) |
| weight | 0,5kg (BMS Sigma II) 0,8 kg (BMS-R II) |

Areas of application

| Swing frequencies | Areas to be used at |
|-------------------|--|
| 10-20 Hz | warming up / regenerating microcirculation |
| 15-18 Hz | lowering of tonus |
| 18-22 Hz | anti blocking measures |
| 18-26 Hz | stretching |
| 20-25 Hz | visceral therapy |
| 22-24 Hz | improvement of circulation, warming up |
| 22 -26 Hz | muscle toning |
| 25 Hz | intensify tonus |
| from 25 Hz up | mobilization of joints |

BMS-Theta

Special characteristics

- maximal comfort and optimal positioning for therapist and patient by ergonomic forms
- easily reachable operating elements
- very easy control facility
- easy access to the whole vibrathode as there is no limiting edge
- Vibrathoden-height and -inclination continuously electronically adjustable
- vibrathode is suitable for bigger muscle areas as well as for indirect smaller and deeper positioned muscles

Technical data

| Parameter | Valance |
|-------------------|--|
| swing frequencies | 15 - 40 Hz |
| measurements | 5-50 Hz optional 1250 x 570 x 650 (1090) mm |
| weight | 95 kg |

Areas of application

| Swing frequencies | Areas to be used at |
|-------------------|--|
| 10-20 Hz | warming up/regeneration/microcirculation |
| 15-18 Hz | lowering of tonus |
| 18-22 Hz | anti blocking measures |
| 18-26 Hz | stretching |
| 20-25 Hz | visceral therapy |
| 22-26 Hz | improvement of circulation, warming up |
| 22-26 Hz | muscle toning |
| 24-26 Hz | treatment of spasm |
| 25 Hz | intensify tonus |
| from 25 Hz up | mobilization of joints |
| 27-30 Hz | pain therapy |

On request training/instruction available on BMS devices for the- rapists and patients.
