LFS-S9-H	9	18	50A	50A	50A	40A	30A	€ 575
LFS-S10-H	10	20	50A	50A	50A	40A	30A	€ 585

THE SOLUTION OF LULU'S FIREFIGHTER SAFETY SWITCH

The LULU firefighter safety switch (LFS) provides the solution. It directly disconnects the DC current in closest to the solar panels automatically and creates a safer situation for firefighters.

1. The firefighter turn off the AC power manually

No more action needed, just like fighting the fire in the house without photovoltaic system.

2. The LFS will shut down the DC power automatically

If LFS detect no AC current more than 5 seconds, it will automatically cut off the DC current at once.
